SEVENTY-ONE YEARS
Growers of AMERICA'S BEST QUALITY FRUIT TREES

Superior strains earliest to bear true to name

Harrisons' NURSERIES
HARRISON BROTHERS, PROPS.
BERLIN • MARYLAND
Crozet, Virginia in the famous mountainous Albemarie County section. He was the United States horticulturist, he is a pioneer in one of the largest peach growing districts of many thousands of Harrison grown peach trees, starting in 1902. A life long manager for more than 30 years for the A. C. Bruce orchards, who planted as | believe and all of the fruit men of Winchester, Virginia agree with me, have ever seen. Will eventually replace Elberta. | want to plant another block, that this peach is the answer to a fruit grower's prayer.

They were the most perfect example of a very large, delicious firm peach | was over to Crozet this summer and got three Dinnals of this amazing peach made a tremendous growth with dark green, healthy leaves and sturdy limbs. | consider it to be the greatest find since Elberta in the 1870's.

This sensational new peach was discovered by Mr. Oscar F. Jones, near original habitat | consider it the greatest find since Elberta in the 1870's.

Mr. C. Purcell McCue—"Personally, I feel this peach will replace ELBERTA in this section."

Mr. C. E. Starkweather—"It bears larger, better colored peaches even with a heavier crop than the Elbertas do!"

Mr. Lee T. Carpenter—"If it proves out in tests as good as it is in its original habitat I consider it to be the greatest find since Elberta in the 1870's."

Mr. Charles H. Martin—"The parent tree of this peach is the largest and the most prolific I ever saw and when it is loaded with those large, uniform fruit, one hundred per cent colored it is a sight to be remembered."

Mr. Edward D. Daugherty—"I know something of the HALE HARRISON BRILLIANT and consider it a very unusual variety which will soon replace Elberta if properly distributed and advertised.

Mr. H. P. Rhodes—"The 500 Hale Harrison Brilliant peach trees I got from you and planted during November of 1949, that 496 are growing and have made a tremendous growth with dark green, healthy leaves and sturdy limbs. I was over to Crozet this summer and got three bushels of this amazing peach from Mr. Oscar Jones, they were off of the parent 116 years old, tree which had probably twenty bushels which he sold off the tree for $4.50 per bushel. They were the most perfect example of a very large, delicious firm peach I have ever seen. Will eventually replace Elberta. I want to plant another block, as I believe and all of the fruit men of Winchester, Virginia agree with me, that this peach is the answer to a fruit grower's prayer.

Ripens 3 to 4 days earlier than Elberta.

Finest flavored yellow peach.

Sold out for Spring 1955.

Handsomeness, Brilliant Almost Fuzzless

Sensational! New! Colossal!

Yellow freestone ripening during midseason at about the same time as Elberta. The fruit is nearly fuzzless and has a brilliant cardinal red almost completely covering a golden yellow ground color even when growing in shade in the interior of the tree. Fruit throughout the tree is uniformly large even when unpruned or unthinned. Tree is large, vigorous and rapid grower. Self pollinating, it bears tremendous crops year after year. Very hardy in bud and blossom and highly resistant to brown rot. Keeping qualities are excellent.

FOR HOME OR COMMERCIAL ORCHARD

Whether you are going to plant one tree for home fresh eating, canning or freezing or one thousand trees for a commercial orchard, we unhesitatingly recommend Hale Harrison Brilliant as the best peach to plant. It will give you more pleasure to eat or more profit in growing than any other peach known today.

WILL REPLACE ELBERTA

For many decades Elberta has been the standard peach of the world by which all peaches have been judged, tests and observations by leading peach authorities confirm our belief that the new sensational Hale Harrison Brilliant surpasses the Elberta in every way.

OUTSELLS AND OUTBEARS

Hale Harrison Brilliant outclasses them all. It is really the one peach that has everything. Its beautiful attractive appearance, huge size, superior delicious flavor makes it have extraordinary favorable eye appeal resulting in higher prices. This combined with its BUMPER crops, "Original tree has produced over twenty bushels a year" make it the outstanding moneymaker.

WIDELY ADAPTED

Hale Harrison Brilliant has been planted in thirty-four states. Reports from these plantings prove it is equally as adaptable to the far south as it is in central and western areas and it even produces highly satisfactory in Canada and other northern peach sections.

LONG PICKING SEASON

One of the finest features of Hale Harrison Brilliant is its early coloring, the golden yellow ground color appears weeks before it begins to ripe, this is the one peach that has a high sugar content even when it is hard. Fruit growers have been amazed at its ready to eat coloring and general smooth skin appearance several days before it is ready to pick and ship, this means a long picking season. Records show that it surpasses in keeping qualities any other peach on long distance shipments.

HARRISONS AMAZING GUARANTEE

Several years of testing in co-operation with leading fruit authorities convince us as to the outstanding merits of Hale Harrison Brilliant that we can make the following guarantee.

"Each and every Hale Harrison Brilliant is a true reproduction of the original strain, it will produce more satisfaction to you than any other peach variety that ripens during its season, on proper proof of failure to do this we will furnish you without charge an equal number of peach trees of any other variety that you desire."

Back of this guarantee are the resources of Harrison Brothers Nurseries with an enviable record of sixty-eight years in the Nursery and Orchard business.

$ale Harrison Brilliantipee Trees grown and sold exclusively by Harrison Brothers Nurseries, Berlin, Maryland.
The sensational peach which has caused the greatest amount of favorable reports of any peach introduced in a half century is that marvelous, big peach, the World's largest, being a patented variety, the Rio-Oso-Gem. U. S. Patent No. 84. It has now been fruited in all peach-growing districts in the United States and Canada, and has definitely proven itself to be the best all-around commercial peach. Ask any man who has grown the Rio-Oso-Gem.

THE BEAUTIFUL GLORIFIED PEACH

This beautiful peach has a brilliant, bright red color, running around 95% good red, whereas they are easy to pack as U. S. Fancy grade. The size of the peach is all that anyone can expect, as many of these Peaches will run a pound or more in weight and in many instances have been reported that the crop would average three-quarters pound per peach. The fine flavor, bright, beautiful red color in the cheek, along with an attractive orange-colored background, has earned it an envious reputation as being the prettiest peach grown.

BEST FLORED COMMERCIAL PEACH

The unexcelled flavor is better than that of J. H. Hale and Elberta. The enticing flavor makes it a very popular peach for fresh eating. The rich flavor is retained when canned or preserved. Now recognized as the leading canning Peach in California. Rio-Oso-Gem is the only Peach which can be processed by quick freezing and still retain its firm texture, with its beautiful, rich, golden yellow flesh and the same flavor as when picked. We have quick frozen Rio-Oso-Gem Peaches, which were picked and processed on September 1, 1944, which are still holding up in excellent condition.

RECORD BREAKER FOR LONG DISTANCE SHIPMENTS

The Rio Oso Gem is the best of all Peaches for long distance shipments and the fruit will stand up longer after being picked than any other variety of Peach in existence. This stupendous variety adapts itself exceedingly well for shipments in refrigerators cars pre-cooled, under standard refrigeration for transcontinental hauls. This is the greatest Peach for shipments on account of favorable reports of any Peach introduced in a half century. This stupendous peach has a brilliant, bright red color, running around 95% good red, whereas they are easy to pack as U. S. Fancy grade. The size of the peach is all that anyone can expect, as many of these Peaches will run a pound or more in weight and in many instances have been reported that the crop would average three-quarters pound per peach. The fine flavor, bright, beautiful red color in the cheek, along with an attractive orange-colored background, has earned it an envious reputation as being the prettiest peach grown.

NATION'S HIGHEST NET CASH MONEY-MAKER RIO-OSO-GEM

IDEAL FOR HOME ORCHARDS

Starts to ripen 7 to 10 days later than Elberta. Rio-Oso-Gem is a very prolific bearer and dependable annual cropper.

RIO-OSO-GEM IS NO EXPERIMENT

Colonel and Mrs. Frank Sleet, Round Hill, Virginia, wrote, "We have the land ready for the 900 Rio-Oso-Gem peach trees, 5 to 6 ft. high, which we picked for April, 1950 planting. It is a wonderful peach and we have had marvelous results marketing it last year at $5.00 per bushel, in spite of the low market price prevailing during the summer of 1949."

HERE'S A "LOAD" OF REASONS WHY HARRISONS' PEACH TREES ARE BETTER

A—Our organization has over 70 years' experience.
B—Every step in growing under the personal supervision of the Harrison Brothers.
C—Thousands of trees in orchards from which our propagating trees are selected.
D—Use of modern methods for planting, cultivating and digging.
E—Over 4,000 acres of various types of soil.
F—Ideal soil and climatic conditions.
G—Co-operation with leading horticulturists and experimental stations all over the world.

Very Early Varieties

DIXIRED. Very early, yellow, cling, medium size, round, bright attractive red blush; good flavor; prolific bearer. Ripens two weeks earlier than Golden Jubilee or about three days later than Red Bird. A new variety originated and introduced by the U. S. Department of Agriculture. Its most outstanding commercial feature is that it is a good shipper and has been planted extensively in Georgia to meet the demands for the very early Peach market.

DIXIGEM. Early, yellow, semi-freestone, red blush, medium size, good quality. Ripens a few days sooner than Golden Jubilee. A new variety originated and introduced by the U. S. Department of Agriculture. Extensively planted in Georgia.

JERSEYLAND (N. J. 135) — Ripens a week sooner than Golden Jubilee, large, firm, attractive yellow flesh, freestone. Tree is hardy, sets buds freely. Introduced by New Jersey Experiment Station.

GOLDRAY. New, very early variety. Red-bud sport strain of Golden Jubilee. Ripens two weeks earlier than its parent and at the same time as Red Bird. It is a "Bud Mutation" discovered in the orchard of Mr. J. Roy Cunningham, Lexington, South Carolina, a customer of Harrison's. Identical in color, size, shape and fine flavor and delicious eating quality of Golden Jubilee, except that Goldray is semi-freestone.

JUNE ELBERTA. A big handsome red and gold Peach, highly colored, excellent quality and a dandy home early Peach.

RED BIRD—Earliest Large Peach, Commanding High Prices

RED BIRD. Bright glowing color—"red as fire"—on a background of creamy white. Handsome. Large—as large as Elberta. Ripens about 40 days before Elberta. Clingstone.

HARRISONS' HARDY PEACH TREES

HARRISON—A Name in Trees You Can Trust
NEWEST VARIETIES' OF PEACHES

TRUE TO NAME

CORONET. Most popular very early ripening peach, CORONET—newest variety cross between Hale Haven and Dixigem. Ripens three days earlier than Dixigem and Jerseyland also week ahead of Redhaven. About three-quarters of peach, bright, attractive red blush over good yellow background color. Flesh is yellow, firm, smooth texture, good flavor, medium size, nearly Freestone. Introduced by U. S. Dept. of Agriculture as the ideal variety to plant in future orchards in place of Dixigem.

REDCAP. Very new popular variety. Just introduced by U. S. Dept. of Agriculture. Cross between Southland and Dixired. Ripens one or two days earlier than Dixired, which it resembles. Attractive bright red blush covering three-fourths of medium sized, clingstone peach. Flesh is yellow, firm with good flavor. Recommend planting Redcap in place of Dixired.

CARDINAL. New variety, an offspring of Hale Haven, which ripens four days ahead of Dixired and week earlier than Red Bird. Attractive red blush over good yellow ground color, with smooth skin. Flesh is yellow, firm, clingstone, medium textured and good flavor. About size of Dixired, also in color, appearance and firmness. New variety just introduced by U. S. Dept of Agriculture with surprising popularity in the South.

HILAND. New variety cross between Southland, Hiley and Hale Haven. Ripens two days earlier than Cardinal, also five days ahead of Dixired, being eighteen days earlier than Red Haven. Attractively red colored, flesh is yellow, fairly firm, clingstone, medium size, good flavor. Introduced by U. S. Dept. of Agriculture.

TULIP. Very early. New variety originated by Missouri Fruit Experiment Station. Ripens at same time as Dixired and Redcap being six weeks earlier than Elberta. Medium to large size nearly round with good red color even before picking time, flesh, yellow, firm, fine texture, excellent flavor, free-stone. Stands shipping well.

SHINN'S DELICIOUS. A true mutation, being very early ripening budspore strain of Burbank July Elberta, U. S. Patent #15, discovered by Mr. C. T. Shinn an Mr. L. S. Smith in their orchard near Russellville, Arkansas. Identical in large size, beautiful red color with handsome golden yellow background color, yellow flesh, freestone and superior flavor as its parent. However, its most appealing characteristic is that it ripens three weeks sooner, between Red Bird and Red Haven, making it about five weeks earlier ripening than Elberta. Many growers say it is better than Starking Delicious peach U. S. plant patent #806.

REDCREST (N. J. 126). New, attractive, large, firm, yellow, freestone peach. Ripens seven days earlier than Elberta.

M. A. BLAKE (N. J. 117). New midseason peach. Medium to large size, good coloring, firm, yellow, freestone. Ripens four to five days earlier than Elberta.

GOLDRAY. See description on page 4.

RANGER. See description on page 6.

REDSKIN. See description on page 9.

N. J. 137. Promising, very early ripening, new variety, still to be named. Large size, bright red blush, yellow, ripens between Sunrise and Jerseyland.

HARRISONS' HI-QUALITY TREES

HARRISONS' "Bud Strains"
Some sixty years ago, and almost every year since, Harrisons’ have planted orchards, not alone for fruit but principally to secure the type of parent fruit tree that was characteristic of a "variety" dominant in bearing qualities coupled with health, vigor and soulty. to withstand changeable climatic conditions. This type of tree became the parent supplying the budding stocks for future orchards in America and true-to-name varieties were assured.

This is Your PROTECTION
Every customer is assured of Harrisons’ Hi-Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons' policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious diseases and insects and to reach you in good condition. Any time trees or plants are received that do not meet these standards they will be replaced free of charge or your money refunded.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory; however, we will replace nursery stock that dies from unavoidable causes at half price, if notified within two months after its arrival.

HARRISONS' NURSERIES.

TRIPLE CERTIFICATION
TRIOGEM (N. J. 70)

Developed by the Master Plant Breeders of New Jersey

MEDIUM TO LARGE, FIRM, ATTRACTIVE

Ripens early, medium to large, oval, firm, high quality, high red color over entire Peach, yellow flesh, freestone, smooth, nearly fuzzless like J. H. Hale, one of its parents; colors several days in advance of its ripening, being 2 days later than Golden Jubilee, or 3 weeks earlier than Elberta. This, combined with its very slow rate of softening, makes it an ideal Peach for commercial growers. Hangs well to the tree after the Peaches become firm ripe. When picked hard to firm it is a good long distance shipper. This is the best commercial Peach ripening at this period, and is being planted now by some growers in preference to Golden Jubilee. Considered as the best new variety of Peach so far originated and introduced by the New Jersey plant breeders.

A REAL PROFIT MAKER

TRIOGEM has been fruited commercially in New Jersey and Maryland for several years. During this time it has topped all varieties in price on the New York and Philadelphia markets which ripen at this time during the summer. Several large commercial orchards have been planted with Triogem and its popularity is increasing each year.

RARITAN ROSE (N. J. 97): Extremely hardy, white flesh, nearly freestone, large size, high red color with good flavor. Ripens a few days earlier than Golden Jubilee. Excellent peach for home and local market.

GOLDEN JUBILEE: Early—Fruit bright deep yellow, medium to large size, oblong shape. Good size, fine appearance and excellent quality with delicious flavor. Ideal for roadside stands and home orchards, also commercial orchards for nearby city shipments. It ripens about ten days earlier than Hale-Haven.

RANGER: A fine yellow freestone, ripening at the same time or just after Golden Jubilee. Beautiful peach. Very hardy, new variety, bears big crops when some other varieties under same weather conditions have light yields. Introduced by U. S. Dept. of Agriculture.

REDHAVEN PEACH—Tops All Extra Early Peaches, Earliest Yellow Freestone Peach

THE NEW EARLY RIPENING YELLOW PEACH THAT RIPENS ABOUT 10 DAYS BEFORE GOLDEN JUBILEE

The most promising early ripening yellow freestone Peach ever introduced. A cross between Hale-Haven and Kalhaven made at the South Haven, Michigan, Experimental Station. Brilliant red color with creamy yellow background, smooth skin, almost fuzzless. Reddens before it ripens. Bears heavy crops and should be thinned for best results. Every grower should try REDHAVEN. We have a good supply of genuine Redhaven trees this season. The demand for this variety is heavy, so order early.

THE SENSATIONAL REDHAVEN

Tops All Extra Early Peaches, Earliest Yellow Freestone Peach

GREAT PEACH COMBINATION—REDHAVEN, TRIOGEM, HALE-HAVEN
HARRISON'S PEACHES
ARE A COLLECTION OF
THE WORLD'S BEST

HALE-HAVEN

Early midseason. Ripens just after Golden Jubilee has been harvested and about 14 days ahead of Elberta. Yellow freestone, large, high red color, firm, fine flavored. It takes on red color early and the peaches show good red color several days before ripening, which gives it a distinct advantage for marketing. When allowed to ripen fully upon the trees the flavor is undoubted the best of any yellow Peach. Tree is an extra strong grower and produces a bumper crop of fruit each season. Very hardy in fruit bud. One of its parents is J. H. Hale, from which it inherits its large size and fine color. The other parent is South Haven from which it attains hardiness, large crops yearly and strong growth. It is the best variety ripening just after Golden Jubilee and should be planted in every orchard. Excellent for fresh eating and quick-freezing.

BURBANK JULY ELBERTA

The Outstanding Medium Early Commercial Peach

Here is the peach that has caused a sensation wherever fruited. Growers in many sections say it is their best medium early, yellow, freestone peach for shipping, local markets and home use. Beautiful golden yellow, almost completely overspread with brilliant red. Ripens about the same time as Hale Haven, but on account of its vivid red color and yellow background with no green color, it can be picked for commercial shipments about four days sooner. Excellent in flavor, even superior to Hale Haven for fresh eating, freezing and canning. Hardy, sure cropper, large size, a sensational money maker. July Elberta is known by different names, such as Burnett Elberta, Burbank July Elberta, Kim Elberta, Burbank Elberta. We offer an outstanding strain selected from bearing trees. Season of ripening about two weeks sooner than Elberta (Original Strain).

AMBER GEM CLING

POLLY

Early mid-season. A large, white flesh, red blushed, freestone, with a real sweet taste of excellent flavor. Trees will withstand temperatures of twenty degrees below zero and still produce big crops of peaches. Ripens about ten days earlier than Elberta. Polly is the peach to plant in the far-North.

FAIRHAVEN

Early mid-season, yellow freestone, medium large, nearly round, mostly bright golden in color with an attractive bright red cheek. Skin is smooth and very tough. Fruit very firm and ships exceptionally well. Ripens 7 days after Golden Jubilee.

CHAMPION

A Good Home Peach. White, freestone, very large; creamy white with red cheek, sweet, juicy, very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside Peach, it is one of the best. Tree is hardy, large grower and productive. Ripens ten days earlier than Elberta.

SUNHIGH

A large, red, bright, smooth Peach which colors well all over before it ripens, softens slowly, makes a good commercial Peach. Flesh inclines to adhere to the pit when hard ripe. The variety seems to do best in hilly sections and requires thorough summer spraying. The fruit is large, roundish, thin-skinned, very uniform in size. Color deep yellow with red cheek. Stone is free. Ripens approximately 18 days before Elberta, at a time to bring high market prices.

HILEY

White. Early midseason. Bears huge crop of fancy Peaches. Freestone, medium size, highly red colored and is a very handsome Peach of exceptionally good flavor. Tree is strong growth, very healthy and an extra heavy bearer. Hiley resembles Belle of Georgia but ripens about 14 days earlier.

SOUTHLAND

Early midseason, yellow, freestone, medium to large, round, attractive red blush with mild, good flavor. Originated by the U.S. Department of Agriculture, being an ideal Peach for the extreme Southern peach belt. Vigorous tree, productive and fruit ripens at the same time as Hiley. Promising commercial peach.

For Greater Profits From Your Land Plant Trees
NATIONAL J. H. HALE

Originated by the late PEACH KING

MIDSEASON—Ripens 2 to 3 days before Elberta.

Original Strain
J. H. HALE

Our "Hales" are propagated direct from the original strain, the variety originated by the late J. H. Hale of South Glastonbury, Connecticut and Fort Valley, Georgia, known as the Peach King of America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored peach. The original strain necessitates cross-pollination and it is necessary, for proper results, to plant a few Belle of Georgia or Elberta or Hiley or any other variety of Peaches along with Hale for cross-pollination.

Extra Large Size
Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about two or three days prior to Elberta.

HARRISON BROTHERS NURSERIES

J. H. HALE—Giant Size, Enticing Flavor

BERLIN, MARYLAND

Belle of Georgia

The Queen of Flavors

THE BEST WHITE MID-SEASON VARIETY

Ripens midseason. Color creamy white with red cheek. Flesh white, red near pit. Size large, freestone. Belle of Georgia, for some time, has been recognized as the best all-around white peach on the market. It is easily the best shipping white peach.

Early Elberta

Midseason. Yellow, freestone, large, lemon-yellow with a dark cast, blushed with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor; rich golden tender flesh, yet firm and has a delightful flavor, excellent for canning. Gleason strain which ripens three days earlier than Elberta.

BELLE OF GEORGIA

The Finest Flavored White Peach

SULLIVAN EARLY ELBERTA

An Early Ripening Red Bud Sport of Elberta

MIDSEASON YELLOW—FREESTONE

Here is the early ripening strain of original Elberta growers have been wanting. Discovered by Mr. Sullivan in a Georgia orchard. Identical to Genuine Elberta in every characteristic except it ripens about seven days earlier. Yellow freestone, firm, juicy, rich, good flavored. Equally attractive as Elberta and is a good keeper. Good for either home or commercial planting.

10 OUTSTANDING REASONS FOR PLANTING SULLIVAN EARLY ELBERTA

1—Size: Large to Extra Large.
2—Yellow Freestone.
3—Rich, Sweet Flavor.
4—Brilliant Red Colored with Golden Yellow Background. Excellent Long Distance Shipper.
5—Tree Vigorous Grower.
6—Bears Large Crops Annually.
7—Colors a Week Earlier Than Elberta.
8—Ripens Slowly After Being Picked.
9—Brings Highest Market Prices.
10—Completely Tested.

Harrisons' Maryland Grown Peach

Trees are the Finest Quality in World SULLIVAN EARLY ELBERTA PEACH The Best New Early Midseason Variety
ELBERTA
(ORIGINAL STRAIN)

Internationally Famous—The Standard by Which All Other Peaches are Judged

Midseason. Yellow, freestone. Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any Peach. It has been the standard for all other Peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. The attractive appearance and uniform large size serve to sell it almost on sight. We offer original strain trees which is the best strain obtainable.

Save Disappointment—Plant Only Harrison ORIGINAL STRAIN Elberta

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture, and red coloring of these Elberta with those grown “on original strain trees” gives sufficient reason why they sold this year at a premium of $1.00 to $2.00 per bushel on the New York and other leading fruit markets.

They Cost No More

Why plant degenerated strains of Elberta when you can plant Harrisons’ heavy yielding original strain trees. They can be purchased at the lowest price that high quality trees can be produced for. It is true trees, size by size, can be produced cheaper by budding them from non-fruiting trees in the nursery row, but this method causes degeneration. Trees grown in this manner will be lighter croppers and require a longer time in coming into bearing.

FOR NEW LOWER PEACH TREE PRICES SEE PAGE 

JUMBO SIZE TREES PAGE 17

Brackett
Mid-Season Late

A Profitable Commercial Variety Slightly Later Than Elberta
Brackett is a comparatively new commercial Peach in some sections but wherever tried it has given uniformly good results. During the past thirty years we have planted many thousands of this variety in but wherever tried it has given uniformly good results. The fruit is rich yellow, with dark carmine cheek. The size runs fully as large or larger than Elberta. Flesh is deep yellow, extremely juicy and is absolutely freestone. Fruit is much better flavored than Elberta. Good shipper.

Popular On the Markets
Brackett commands unusually high prices on the market and often outsells Elberta twenty-five to fifty cents per bushel. We know the grower who needs a Peach ripening slightly later than Elberta will make no mistake in planting Brackett.

Plant Harrisons' Original Strain
HARRISONS’ were the first to popularize this great variety and distribute it throughout the Peach-growing sections. We offer trees that are propagated direct from the original strain and they are sure to produce results.
Midseason-Late. Large, round, yellow, freestone, very attractive with high red color. It is a Hale type of Peach, having good quality and brings high prices on the fruit markets. Ripens three days later than Elberta. A good commercial Peach as it is a prolific bearer of large size, highly red-colored Peaches and is a favorite wherever planted. Harrisons are growing the original strain of Shippers Late Red which is far superior to other types and strains of this variety. Should be planted in every commercial orchard, as well as home orchards. Dependable trees which are absolutely "true to name."

Harrisons' Maryland Grown Peach Trees are the Finest Quality in the World

Late Ripening Varieties

LATE ELBERTA. (Gemmer's Late Elberta.) Late, yellow, freestone, large, high red color, fine quality, good shipper. Is a typical Elberta in fruit and tree characteristics, but ripens 4 to 5 days later than Elberta of the original strain.

LIZZIE. Late, distinct type of Elberta, very large, freestone, yellow, which ripens 14 to 16 days later than Elberta, having same prominent coloring characteristics as its parent.

Make More Money
Have More Pleasure
Plan Your Peach Orchard So That You Can Pick Good Peaches For Ten Weeks

PLANT LARGE SIZE PEACH TREES FOR QUICKEST AND BEST RESULTS. MAKE MONEY BY SAVING TIME.

Harrisons’—The Nation’s Peach Tree Nurseries
71 YEARS LARGEST GROWERS OF HIGH QUALITY TRUE-TO-NAME PEACH TREES IN THE WORLD
Because They Are

- Absolutely true to name.
- Healthy—vigorous.
- Disease free.
- Hardy—budded fruit trees are superior to grafted.
- Properly hardened off before digging.

- Come into bearing earlier.
- Yield bigger crops of better fruits.
- Have larger roots.
- Take hold quickly in new locations.
- The best trees for less money.
- Propagated from bearing trees of selected strains.

WILLIAMS EARLY RED

The Big Red Home or Market Apple

Just at the time when people are hungry for a fresh, new red Apple, this superb sort comes into market. In New York, Boston, Philadelphia, and other eastern cities as well as middle western and southern cities, the fruit sells as quickly as it hits the market house or dealer's store. It holds its own anywhere and has proven to be—

The Best Summer Apple

The rich bright red fruit catches the buyer's eye and is ordered at a price that yields the grower a good profit. Apple is large, with tender, crisp, white flesh, juicy, slightly tart. The trees come to bearing when quite young, producing freely and steadily. Fine for a filler or permanent tree, and being hardy, can be successfully grown in New England states and Canada. All orchards should include Williams Early Red.

A good pollenizer for Red Yorking and Red Rome Beauty Apple trees.

LARGE TRANSPARENT (Lodi)

A New Summer Variety

Ripens Very Early—Destined to Replace the Ever-Popular Yellow Transparent

We believe there is a big future for this new summer Apple. Our commercial friends should lose no time in anticipating the demand for an Apple of this type.

Somewhat of a dwarf grower, bearing very young, it makes an excellent filler. The skin is a clear yellow, white flesh, of medium size. A good pollenizer.

EARLY APPLE GROWERS MAKE MORE MONEY WITH LARGE TRANSPARENT

Yes, actual profits, that's what we mean. It can be done—here's why:

Yellow Transparent Apples ore always first on the market and generally bring good profits when they attain proper size. Size on Yellow Transparent is hard to get, but easy on its big brother, "Large Transparent," which ripens at the same time.

Large Transparent Apples Average Up to 1/2 Inch Larger Than Yellow Transparent—This Means $1.00 to $2.00 per Bushel Extra

WILLIAMS EARLY RED—Ready for Market When Folks Just Get Hungry for Apples

HARRISONS' HIGH QUALITY APPLE TREES

True-to-Name—Certified 100% Healthy.

**GRIMES GOLDEN**
Harrisons’ Selected “Big Yield” Strain—Best Home Orchard Apple

Autumn, medium sized, golden yellow, tender, rich, aromatic, sub-acid, delicious, possibly the best flavored Apple known, and a good keeper. No better variety exists for eating raw or for cooking. Tree is very hardy and one of the heaviest bearers known, producing extra large crops annually. Excellent variety for a filler, as it comes into bearing very early. Grimes Golden is the best pollinizer known, especially for Stayman Winesap, Lowry, Baldwin, Cortland, Rome, Winesap, McIntosh and others. Be sure to include Grimes Golden in your orchard. IT IS EASY TO GROW.

**YELLOW DELICIOUS** It’s Golden!
A golden yellow Apple with decided “Delicious” characteristics. Yellow Delicious has a remarkably good flavor, and is most popular for eating during the fall and winter months. Late September and January finds it at its best. Many people think it superior to the famous Delicious. Fall.

The Yellow Delicious tree is very thrifty, hardy, and a vigorous grower. It is renowned for its heavy bearing of fruit at a very early age. You can depend on a good yield of ripened fruit each year. Excellent pollinizer for all varieties.

**STAYMAN WINESAP** Big Yield Strain. Without a doubt the heaviest yielding strain of Stayman Winesap obtainable. It colors solid red when climatic and soil conditions allow it to remain on the trees until it is mature. This heavy yielding tree is much superior to any strain of McIntosh, especially the dull striped kinds. If you do not have trouble getting sufficient color then we recommend you planting this time-proven, heavy yielding strain. McIntosh Red is very hardy and produces bumper crops each year. Generally considered as the best flavored Apple grown. Recommended for home or commercial orchard plantings.

**McINTOSH RED**
Improved Type—Heavy Yielding Strain Preferred by Many Growers in the North.

Until the discovery of our New Super Red McIntosh our improved McIntosh Red was the best strain of McIntosh available. It colors solid red when climatic and soil conditions allow it to remain on the trees until it is mature. This new strain will bring new profits to the grower of Baldwins. Late fall.

**CRAB APPLES**

- **HYSLOP CRAB APPLE** The Dual-Purpose Tree
- **NEW LOWER CRAB TREE**
- **CRAB TREE PRICES**
- **NEW CRAB SIZE TREE PAGE 17**

**SMOKEHOUSE.** Large Apples of superfine flavor, excellent for eating, yellowish green or with dull red and with many russet dots; flesh firm, crisp, juicy and aromatic. Tree large, vigorous and reliably productive.

**WINESAP** An Apple favorite in Virginia. Sometimes called Old Winesap and Virginia Winesap. Medium size, oblong, smooth, and a fine dark red—one of the best red colored Apples grown; flesh yellow, crisp, tender, very juicy, aromatic, firm and of excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. Strong grower; comes into bearing early. Our strain produces bumper crops of the larger sized Apples with plenty of color.

**MAMMOTH BLACK TWIG (Paragon).** Extra large in size and round; skin smooth, yellowish covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp, sub-acid, aromatic, fine flavor, of excellent quality, long keeper of great value. An important commercial variety in the East. Tree is vigorous and highly yielding. Big crops. Plant Delicious or Jonathan as a pollinizer.

**NORTHEASTER GREENING.** Large, round, greenish yellow; juicy, firm, good quality; splendid keeper, ships well. Attractive Apple when packed in bushels, demands good prices, excellent baking Apple. Should not be planted extensively because crops are not so certain, due to blossoming early. Trees are extremely hardy, vigorous, and bear very young.

**RHODE ISLAND GREENING.** The Popular Northern Apple. Large, greenish yellow; flesh crisp, juicy, quite acid, firm, finely grained, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel Apple, brings good prices. Generally planted in New England, New York, Michigan, and Canada, but not advisable to plant south of the Mason-Dixon line.

**ROME BEAUTY.** Large, round, red, flavor and quality above average.

**RED LOWRY.** Red bud sport strain, identical with its parent Lowry in all respects except the exception that its color has a much higher red color and when matured full red color. It can be picked 2 to 3 weeks earlier than Lowry, due to its earliness in season and color. Interplant a few Grimes Golden as a pollinizer.

**DWARF FRUIT TREES**
Take Little Space to Produce Big Delicious Fruit

**DWARF APPLES**
These little trees can be planted 8 to 10 feet apart, and are only 10 to 12 feet high at maturity. Most varieties start producing fruit the first or second year after planting, and the fruit is as large or larger than that from standard trees. Plant two or more varieties for pollination.

**Varieties:**
- Large Transparent
- Grimes Golden
- McIntosh Red
- Red Delicious
- Yellow Delicious
- Red Rome Beauty

Price: 2-yr., 3-4 ft., $3.25 each; 3 for $9.00.

For Real Profit Plant Harrisons’ Selected Strain Trees

NEW BRIGHTER
Bear Giant Size, Rich Colored, Fine

A HORTICULTURAL TRIUMPH—UNEXCELLED FOR

TRIPLE RED DELICIOUS—THE BEST
King of All Red Apples
Solid bright red color month earlier than the original Red Delicious. Has all the fine qualities of famous parent strain. Plant Harrisons' Triple Red Delicious to insure your future financial income.

AMERICA'S HIGHEST PRICE APPLE
EXCELLENT FLAVOR

Budded
Apple Trees are Far Superior to Grafted
Apple Trees
2. Same as Parent in Flavor, Quality, Productiveness.
4. Produce Highest Percentage Fancy Fruit.
5. Tests Show They Come Into Bearing Sooner.
7. Completely Tested.
8. Excelled by No Other Red Bud Sports or Strains.
10. Greatest Profits.

SCARLET RED STAYMAN
BRILLIANT COLOR
We offer to the public the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard. Scarlet Red Stayman takes on bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked earlier if desired.

A Ready Market at Top Prices
Scarlet Red Stayman is the best general purpose Apple for planting in the East. Its solid scarlet-red color and its bright attractive finish causes it to command highest market prices. The fruit is large and it produces bumper crops each year.

FOR JUMBO APPLE TREES
SEE PAGE 17

SUPERIOR TO ALL OTHER TESTED STRAINS
PLANT BIG TREES FOR QUICKEST AND BEST RESULTS
RED VARIETIES
Flavored Apples
HOME OR COMMERCIAL ORCHARDS

RED ROME BEAUTY
An improved Rome Beauty, identical in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy Apples and also superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size Apples. The tree is a vigorous, strong grower, exceedingly hardy. Pacific Coast strain. Has always been very popular.

NEW STRAINS OF RED ROME
Can supply two new additional red budspor strains known as C. and O. Red Rome also C. and O. Red Rome number 262.

SUPER RED McINTOSH
A new strain of McIntosh Red that starts coloring earlier and produces a larger percentage of extra-fancy fruits. Super-Red McIntosh, when allowed to mature on the trees, is slightly darker in color than our regular improved McIntosh Red. Has all the best qualities of ordinary McIntosh and will mean larger profits for growers who have been unable to get sufficient color. McIntosh has been the favorite in the North; this new strain extends the planting area farther South. The most highly colored solid red strain available, regardless of price. We have some exceptionally good one-year trees and fine two-year trees to offer this season. Plant McIntosh strain of Apples for big profits, equally as good in home orchards as it is commercially.

HARRISON BROTHERS NURSERIES, BERLIN, MARYLAND
A WHOLE ORCHARD FOR ONLY $2.50

Five Varieties of Apples for Fresh Eating from Late June Until Early November produced on the same tree.

Here's the opportunity for those with limited space to have five mighty desirable varieties of Apples, all budded on one tree for a little more than the cost of one tree. Requires only 20 ft. space when fully grown. Each tree is budded to Transparent for first summer variety, Williams Early Red, Red Gravenstein, Triple Red Delicious and Yellow Delicious for autumn varieties, Scarlet Red Stayman and Red Rome Beauty for winter varieties.

- Budded to 7 varieties, however, guaranteed to have 5 or more.
- 2 year, 4 to 5 feet, well branched at $2.50 each.
- 2 year, 5 to 6 feet, extra well branched with good heads, at $3.25 each.
- Jumbo Size, 3 year, 6 to 8 feet, extra well and heavily branched with beautiful heads at $4.50 each.

New Gigantic Red MacDonald Rhubarb

If you want something different, something delicious in garden fruits, then plant some of this grand new MacDonald Rhubarb.

Stalks are of giant size on mature plants, and a rich rosy red in color. This beautiful color carries through the stalk. Sauce made from it has the red color of a dish of Strawberries. Flavor is mild and pleasing. This new Rhubarb does not send up seed stalks and never becomes tough or stringy. Just cut in small chunks and cook. Do not remove the tender skin; it cooks right up with the stalk.

Heavy plants: $1.00 each; 6 for $5.40.
Harrisons' Jumbo Size Fruit Trees are Definitely Superior

SAVE TWO TO THREE YEARS BY PLANTING SUPER-SIZE FRUIT TREES HAVING JUMBO GROWTH

GUARANTEE ON JUMBO TREES
You take no chances when you buy Jumbo trees from Harrisons'. If they are not satisfactory your money will be cheerfully refunded in full, provided they are properly packed and returned within 24 hours after receipt.

GUARANTEED TO LIVE AND GROW SATISFACTORY

Best Trees OBTAINABLE—Carefully Selected Specimen Trees
NOW Everyone Can Grow Extra Large Rich-Colored, Extra Rich-Flavored, Healthful, VITAMIN-PACKED FRUIT In His Own Back Yard

Time is money, therefore, for the additional expense of a few cents per tree you can plant Jumbo size fruit trees and eat the fruit from them surprisingly soon after planting. The Super-Size fruit trees, being especially grown as Jumbo trees, are the strongest growers. They are exceedingly vigorous, very hardy, and produce tremendous crops of fruit. These are ideal for the home garden.

NOW IT IS EASY TO GROW FRUIT WITH NEW, ALL PURPOSE SPRAY
Spray your peach, apple, pear, plum, cherry, apricot and nectarine fruit trees with one pound of PARATHION (15% strength) powder, a sensational new insecticide, best for general use ever discovered, which will kill all insects, along with three pounds of WETTABLE SULPHUR, paste type preferred, for the control of Rot and other fungus diseases, to fifty gallons of water.
Parathion makes it easy to grow high quality fruits in your garden and home orchard.

Harrison Brothers Nurseries
BERLIN, MARYLAND
Harrisons’ Maryland Grown Jumbo Fruit Trees are the Finest Quality in the World

GUARANTEED TO LIVE AND GROW SATISFACTORYLY

Harrisons’ The Nation’s Fruit Tree Nurseries
ABUNDANCE. Early, large, color pinkish red changing to darker red, with thin bloom. Yellow flesh. Very juicy, sweet and tender, pleasantly aromatic. Hardy, very productive. Adaptable to a wide diversity of soils and climates. A product of Burbank, the master plant breeder. Should be in every orchard.

BURBANK. Early, about one week after Abundance. Large, cherry-red with thin lilac bloom. Flesh amber-yellow with rich, sugary flavor; high quality and very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

FORMOSA. A midseason variety of excellent and prolific bearing qualities. Large greenish yellow, overlaid with red. Alternate bearer. Heavy cropping.

ITALIAN PRUNE (Fellenberg). Late. Medium size, showy, purplish red fruit, excellent quality for canning, cooking, preserving or spicing. Prolific cropper.

BRADSHAW. Very large, fine early Plum; dark violet-red, just soils and climates. Attractive. Good canner Plums.

GRAND DUKE PRUNE. Late. Commercial variety. Purplish black, juicy, sweet; cooking. Very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

YELLOW EGG. Late. Large, golden yellow, firm, sweet. Very productive; will withstand adverse weather conditions. This variety deserves more or less than a smooth-skinned Peach. The melting, juicy texture of the Nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer.

SURE CROP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Versatile flavor.

METHLEY. A recent introduction which is rapidly gaining popularity due to its fine quality and handsome appearance. The fruit is medium to large in size, reddish purple in color with red flesh. It is juicy, sweet and of distinctive flavor. The tree is vigorous and upright in growth habit. Does well on most types of soil and is a heavy annual bearer.

SURE CROP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Versatile flavor.

SANTA ROSA. Early. Fruit very large size, round, purplish red, flesh reddish near skin, firm, juicy, and has a pleasant tart flavor of exceptionally high quality.

SATSUMA. Midseason. Best flavored semi-freestone, blood, flesh Plum known. Large size. Flesh dark purplish red, juicy, sweet; possessing an alluring aroma. Originated by Luther Burbank.

EARLY GOLD. Early. Golden yellow, semi-transparent, covered with bright scarlet-red blush.

SHROPSHIRE DAMSON. Late, medium size, dark purple. Very productive. The best for canning preserves and jellies. An excellent variety for fresh fruit shipments to city markets, always demanding high prices.

---

**SWEET CHERRIES**

What fruit is more pleasing than the Sweet Cherry? The ideal fruit to plant in the back yard. We have a good supply of first-class trees in the following varieties:

**BING.** Very large, dark brown, flesh firm, sweet. Midseason.

**BLACK TARTARIAN.** Very large, sweet, purplish black color, juicy, rich flavor, heavy bearer and most profitable sweet variety grown. Early.

**GOLDEN WAX.** Large, yellow, fine flavor. Bears bumper crops. Easily grown. Midseason.

**GOVERNOR WOOD.** Large, light yellow, marked with red, sweet flavor.

**LAMBERT.** Extra large, sweet, jet black, very popular. Midseason.

**NAPOLEON.** Large, pale yellow, bright red cheek, sweet, excellent flavor, prolific bearer. Midseason.

**SENECA.** Resembles Black Tartarian, but ripens two weeks earlier, rich sweet flavor.

**SCHMIDT.** (Schmidt's Bigarreau.) Large, sweet, deep black, tender, fine flavor. Midseason.

**WINDSOR.** Large, sweet, almost black, fine quality. Valuable late.

**EMPEROR FRANCIS.** Large, high quality, resembles Napoleon.

**YELLOW SPANISH.** Large, sweet, yellow with red tinge. One of the most beautiful and popular of the light-colored Cherries. Heavy bearer. Midseason.

May be Assorted Varieties of Sweet Cherry Trees.

For Jumbo Sweet Cherry Trees, see Page 17.

---

**HANSEN'S IMPROVED Bush Cherry**

An ornamental shrub producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introduced by Dr. Hansen of the South Dakota Experimental Station. Leaves are silvery green, turning to red in autumn. Attractive white blossoms add to landscape effect.

3-Year Bushes, Bearing Size, $1.00 each; 10 for $9.00.
For home, for canning, for market, the best. Ripens during summer.

A golden colored Pear, with a red cheek on most specimens. Bartlett mellows and is excellent for eating very early in the fall, yet when picked a week before it is ripe, and properly stored, will keep till late. Flavor delicious and mussy; flesh buttery, rich and juicy. One of the finest Pears that grows, to eat raw. A mingling of the flavor of Bartlett Pear and Quince gives about the finest taste of any food this world's folks have. Bartlett trees bear early, produce enormous crops, and are not nearly so subject to damage by insects and disease as other sorts. The trees do especially well with high culture.

Fancy Bartletts Bring Highest Prices

Bartlett Pears always sell on the markets even when other sorts are not in great demand. The fruit is so handsome and appealing that it pays to pack it in fancy containers. Bushels or basket boxes are best adapted. The fruit ought to be sorted and graded, wrapped in tissue paper, and arranged in the container practically the same way that you pack Apples. Pears are sometimes packed in Peach carriers, and sell to good advantage. Plain fruit can be sold without wrapping, in small baskets or boxes. One or two Bartlett Pear trees in the city yard will furnish a considerable amount of fruit; a half dozen will supply the family with fresh fruit and a surplus for preserving.

KIEFFER
SURE CROPPER—EASY TO GROW

Of all the Pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hardy and thrive on varied soils in any climate. Kieffer and Koonce are the only Pears that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet it is the leading commercial Pear in Canada. Kieffer is blight-resistant, and can be successfully planted in large orchards. This fruit is large to very large size; skin yellow, with light vermilion cheek; flesh yellowish white, very juicy. Noted for being a long time keeper. Most popular canning Pear.

BEURRE BOSC. Large size, fine quality, brings highest market price. Late.

BEURRE D' ANJOU. Large, green in color, somewhat yellow when ripe, buttery, melting, rich, vinous, good flavor. Tree vigorous, hardy, prolific bearer. Very late.

CLAPP’S FAVORITE. Large size, hardy and very productive. Thrives where other varieties fail. Very early.

DOUGLAS. Very resistant to blight. A winter Pear of wonderful quality, golden yellow with a faint blush on the cheek. Bears early.

DUCHESS. Very large, dull greenish yellow. Tree somewhat dwarf but a dependable bearer. Late.

KOONCE. One of the earliest Pears, free from blight, does not rot at the core like many early Pears. Fruit is yellow, medium to large, delightful flavor. Very productive.Extra good for southern states.

SECKEL. A beautiful and delicious little Pear. One of the richest and highest flavored Pears grown. Tree dwarf, bears prolific crops. Late.

WORDEN SECKEL. A seedling of Seckel. Superior in size and color. Mid-season.

Grow Finer Flavored Berries
With Harrisons’ Select Certified Raspberry Plants

LATHAM
WORLD’S LEADING RASPBERRY

The sensational yields of this variety have attracted the attention of growers everywhere, and all those who have given it a trial are praising the many unusual features they have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every respect you will be both delighted and surprised after giving it a trial.

Large Berries—Tremendously Productive
Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. Latham ripens with Cuthbert, covers a longer fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark, rich red.

A Blue Ribbon Winner for the Home and Commercial Grower. It simply cannot be equalled.

HARRISON BROTHERS NURSERIES BERLIN, MARYLAND

INDIAN SUMMER
Sensational New Everbearing Raspberry
A dish of big red juicy Raspberries sprinkled with sugar and swimming in pure cream, it can be yours for every meal from June into July, and again from mid-September until frost, if you will plant Indian Summer. Makes tasty, scarlet-red sauce or pie and the finest jams and preserves you ever tasted. Frozen Indian Summer Raspberries is like having them fresh from your garden the year ‘round.

Indian Summer Raspberries are no experiment; they have fruited successfully for thousands of gardeners in nearly every section of the country. This is truly a champion for your garden. Order early.

The Most Popular Black Raspberry
CUMBERLAND
Midseason to late. This is the most popular Blackcap of the present time, because of its great size, firmness, and productiveness. The fruit is the largest of the Raspberry family, and is of such handsome appearance that it is sure to bring the top prices on the market.

A BIG CROP EVERY YEAR
Cumberland has never been known to fail to produce a big crop every year. This variety is perfectly hardy and tremendously productive, the bushes are vigorous, upright and healthy. Berries are glossy black in color, not equalled by any other variety in quality, flavor and appearance. It’s good to eat and good to sell.

Here’s Another Extra Good Blackcap
The Mammoth New MORRISON
This brand new variety has been a sensation wherever planted. Mammoth sized berries, glistening jet-black color, rich flavor, fewer seeds, heavy producer. The thrifty, strong, hardy plants are heavily rooted and disease resistant. Easy to grow, excellent for canning, eating fresh, freezing. Ripens slightly later than Cumberland.

INCREASE YOUR PROFITS WITH
The New Mammoth Berry That Will Revolutionize the Berry-Growing Industry

Two Inches in Length

The new Boysenberry is truly a glorified Youngberry. We offer it again this year because of the tremendous large size of the berries; because of its very prolific fruiting; and lastly, because we think that it has the highest qualities of all bramble fruits. They are just as easy to grow as Blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. Has a rich, tangy flavor all its own.

No. 1 plants: 3 for $1.15; 6 for $2.05; 12 for $2.95; 25 for $4.65; 50 for $8.10; 100 for $14.05; 250 for $30.40; 500 for $48.85; 750 for $66.95; 1000 for $85.00.

Lucretia Dewberry

Lucretia Dewberry (Long, mammoth black berries, recognized as the leading variety. incomparably better in every way than any Blackberry you have ever seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before even the earliest Blackberries. Big, uniform size makes them top-notchers in price on any market. For real profits and for home and commercial growing, Lucretia is the only variety of importance.

No. 1 Plants: 6 for $1.45; 12 for $2.10; 25 for $3.30; 50 for $5.70; 100 for $9.90; 250 for $21.40.

Eldorado Blackberry

A Heavy Yielding Blackberry that Spells Success Everywhere

The Heavy Yielding Variety. The heavy producing quality of Eldorado has placed it first among Blackberries. Every good quality possessed by other Blackberries is emphasized in Eldorado. Berries of enormous size, shiny jet-black, sweet pleasing flavor. For Home or Commercial Planting. Ideal for all purposes, both home and commercial, being so firm that it will remain in good condition for three or four days, and can be sent to distant markets where it always commands the highest price. This variety is making big money for other growers and it will do the same for you.

NEW LOWER PRICES OF BLACKBERRIES: Selected plants, 1-yr., No. 1 grade, 6 for $1.65; 12 for $2.60; 25 for $4.50; 50 for $7.50; 100 for $12.00; 250 for $25.00.

NEW RED LAKE CURRANT

NEW LOWER PRICES OF BLACKBERRIES: Selected plants, 1-yr., No. 1 grade, 6 for $1.65; 12 for $2.60; 25 for $4.50; 50 for $7.50; 100 for $12.00; 250 for $25.00.

GOOSEBERRIES

NEW RED LAKE CURRANT

HARRISON BROTHERS NURSERIES BERLIN, MARYLAND

[22]
NEW GIANT Cultivated Blueberries

- Profitable to Grow
- Delicious Berries
- Very Ornamental

Once Planted Lasts a Lifetime

Blueberries are not only the largest money makers of all time commercially, but are also one of the easiest fruits to grow. The berries bring up to 75c per quart—$400.00 per acre the third year. They are exquisitely mild, sweet and delicious, and bring highest prices on the market. The demand for Blueberries is practically unlimited. A planting lasts a lifetime with proper care and the plants will pay for themselves their first crop. A few bushes planted in the shrub border and in the garden will be sufficient to supply you with berries for years.

Blueberries—Easy to Grow

Set the bushes 5 by 7 feet apart in moist, acid soil. If your soil is sweet, it may be made acid by mixing with it a little quantity of acid peat, rotton leaves and pine needles, or similar material. Fruit ripens over a period of several weeks. Plant two or more varieties so as to insure proper pollination.

Very Ornamental

As an ornamental shrub the Blueberry cannot be surpassed. Full of lovely pink blooms, which open to bell-shaped, white flowers in June. Plants are compact, low growing, having waxy green leaves which turn red during the fall. Twigs are reddish brown and very showy during the winter.

BLUEBERRIES—Ornamental as well as fruitful
Jumbo Size—Bear First Year Planted

SPECIAL JUMBO SIZE BLUEBERRY PLANTS

Have already fruited in the nursery. Ready to bear big crops of luscious berries on your own grounds and are as easily grown as a shrub or Rose bush. You can pick delicious berries the first season planted, and each year they will produce a larger crop with very little attention. We only have a few hundred of these Jumbo sized plants to offer. Can supply in the following varieties only: Cabot, Rancocas, Concord, Rubel, and Jersey.

Prices: Jumbo size 4-year-old, 2 to 3 ft., $2.50 each; 3 for $6.75; 10 for $20.00.

NEW LOWER PRICES OF ALL BLUEBERRIES

LEADING BLUEBERRIES

CATOT. Plants seldom exceed three feet in height and make a broad, low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

CONCORD. The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

RUBEL. A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July. Best commercial variety.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue, and ripe about the same time as Rubel.

Harrison Brothers Nurseries
BERLIN, MARYLAND
Four Undisputed Strawberry Leaders

STRAWBERRY GARDEN OFFER
No. 21
25 BIG JOE 25 PREMIER
25 FAIRFAX 25 CHESAPEAKE
ALL FOR $3.75

BLAKEMORE
No Strawberry has become so popular so quickly as Blakemore. It is the most popular variety in all America. Ripens several days before Premier and is equally dependable, producing big crops every year. The plant is healthy and stands up well during drought. The berries are large, firm, an attractive red and good quality. Fine for canning and preserving because it holds its color and shape so well.

DORSETT, Early
Large Fruit—Vigorous Grower—Heavy Crops
Dorsett berries average large size, considerably larger than the Premier, in fact, their size is comparative with Chesapeake, which is the outstanding late berry. Plant growth is exceedingly vigorous, being far more vigorous than most other varieties. Dorsett yields large crops of fancy, light red berries.

FAIRFAX, Early
The Sugar-Saving Berry
Color is a deep, full red; its rich, sweet flavor brings buyers back for more. Fairfax berries are exceptionally firm, making it an ideal shipper. Superior to all for home use, equal to any for commercial planting.

PREMIER, King of the Early Berries
Too well known to need much description. The standard early berry by which all other varieties are judged. Holds all records for big crops and big profits. Premier has filled more crates, made more dollars, and brought joy to more Strawberry growers than any other variety ever grown.
Adapted to All Soils—Heavy Yields. It thrives on most any type of soil and is a rampant plant maker. Premier fruits extra early when berries are selling at a high price. It is a big yielder of big, bright red berries of fine flavor. For home gardens, local markets, or for shipping moderate distances it has outclassed all the other varieties.

BIG JOE
The Old Reliable Midseason Variety
LARGE YIELD—FANCY FRUIT
FINE FLAVOR
Big Joe is a heavy producer of large, brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plants are good growers and heavy yielders. This variety succeeds on all types of soil but does extremely well with good care and fertility. Be sure to include Big Joe in your planting this spring. Our big yield strain insures big crops.

CATSKILL
Midseason Berry that will produce the largest crops of bigger berries of any midseason variety. Catskill is entirely satisfactory as to firmness, quality, color and attractiveness, season of ripening and climatic adaptation. The highest record of marketable berries was made with this variety. In shipping respects it ranks with Chesapeake and Lupton. It is rated equally as attractive as Fairfax or Dorsett. The berries are borne on rather long fruiting stems which makes it easier to get at in picking.

FAIRFAX
The Sugar-Seving Berry
Color is a deep, full red; its rich, sweet flavor brings buyers back for more. Fairfax berries are exceptionally firm, making it an ideal shipper. Superior to all for home use, equal to any for commercial planting.

CHESAPEAKE
The Favorite Late Berry
It is a good producer of very large berries that hold their shape well until the end of the season. It does not yield as many berries per acre as some of the early varieties, but the size and quality of its fruit enables it to sell for a much better price which offsets this disadvantage. The berries are firm enough to ship to distant markets and to arrive in first class condition. An exceedingly valuable commercial berry but equally adapted for home planting. We offer a selected "Big Yield" strain.

RED STAR
Here's A New One Extra Good—Very Late
This is the other new one by the U.S.D.A. and a cross between the Chesapeake and Fairfax. This is the late one. Berries are large, and are borne on short, stout stems that stay well under the leaves, thus protecting them from late frosts. Makes a good fruiting row, and plenty of money can be made from growing this one, as late berries always bring a high price.

TEMPLE
The Successful New Variety—Can Be Grown Anywhere.
If you have ever tried raising Strawberries and failed, here is the berry for you to try. It will grow on light, sandy soil as well as heavy, water-soaked kinds. The quality of this berry is excellent and its plant growing characteristics are supreme. Berries are extra large, firm, beautiful in appearance, fine texture and flavor. Excellent for freezing, canning, eating fresh, also local and long distance shipments. This berry is the result of years of years of cross-breeding work and is unquestionably the finest new berry for both commercial and home plantings that has been introduced in many years. It has our highest recommendation.

Harrison Strawberry Plants Are Bred Up for Bigger Yields and Tell the Story at Harvest Time.
Pick World’s Finest Strawberries From Your Own Plants

A Big Profit From Your Own Back Yard

Everybody prefers the flavor of vine-ripened Strawberries. They are more delicious and usually sell for 10c to 25c more per quart. Customers pay premium prices for garden fresh Strawberries and small growers make real money, up to $500.00 per acre.

Whether you have a small garden or several acres, you can make a big extra cash income by planting Harrisons' "Big Yield" Strawberries. Others are doing it, why not you. It costs only a few dollars to get started.

Extra!

Streamliner

The Greatest Everbearing Strawberry

SWEE T AS HONEY—EXTRA LARGE
EXCELLENT FOR EATING FRESH OR FREEZING
MAKES HEAVY FRUITING BED

- Berries in 90 days or less. No need to wait several months. Plants planted in March or April will commence bearing in early July and bear until frost.
- Three Big Crops From One Planting. Streamliner needs no nursing along as some everbearers do. They are thrifty growers, and do not require exacting soil requirements. Pick your first crop this summer and fall, second crop next June, third crop the following summer and fall.
- It costs less to grow your own berries if you plant Streamliner. Easy to grow, just space them 12 to 15 inches apart in the row with the rows 2 1/2 to 3 1/2 feet apart.
- Profitable to raise. Grow all the berries you need for your own use and sell the rest to your neighbors.

Harrisons' Everbearing Mastodon

A TRIPLE YIELD

1—Plant this spring.
2—Pick first crop, July to frost.
3—Pick second crop, June next year.
4—Pick third crop, August to frost next year.

3 REAL CROPS—3 BIG PROFITS
Bears in 90 Days, and, too, It’s the Best Family Garden Strawberry—Loads of Big Berries in 90 Days

Unlike the other varieties, Mastodon begins to bear luscious berries 3 months after planting and bears three big crops in 18 months. Customers have reported yields as high as three quarts per plant the first fall.

WHY WAIT A WHOLE YEAR?
Plant Harrisons' "Big Yield" Mastodon this spring, and grow your own berries this summer and fall, instead of buying them. If you have more than you can use, they are easily disposed of in the nearby community, where they will bring top prices.

Dependable - Hardy - True-to-Name

Harrisons' Selected Strain "Big Yield" Strawberry Plants Are Better

1—Sixty-five years' experience in growing, propagating and handling Strawberries.
2—Every plant propagated by Harrison is the offspring of a selected plant that is outstanding in vigor and productiveness.
3—Absolutely free from diseases and insects.
4—Grown on specially nurtured high ground soil.
5—Our method of digging enables us to get all the roots.
6—Clean, graded and packed in modern packing house.
7—Absolutely true to name.
8—Prompt service.
9—Better plants for less money.

HARRISONS' BIG YIELD GRAPE VINES
BEAR BETTER CROPS
OF BETTER FRUIT.

Harrison Brothers Selected Varieties Grapes

CACO. Red. Midseason. Fruit is very large and handsome. A rich wine-red color. Not a very rank grower and a shy bearer.

FREDONIA. Blue. Very early. Originated by New York Experimental Station. The bunch and berry are large, with excellent, juicy, delicious flavor. Vigorous and productive. Ripens fully ten days before Moore's Early.

NIAGARA. White. Midseason. Best of the standard light colored Grapes. Bunches of large greenish white berries change to pale yellow when fully ripe. A rank grower and very productive. Popular with vineyardists and home gardeners in the North, as well as the South.

WORDEN. Blue. This excellent Grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch and berry. Several days earlier. Valuable for garden and vineyard.

HARRISONS’
DECORATIVE EVERGREENS
Our Splendid Trees Embellish the Grounds of Beautiful Homes the Country Over

SPREADING YEW
The beautiful Yew of moderate bushy growth, usually grows wider than it does tall, starts branching from the bottom, developing into a bush form. The spreading branches are densely clothed with short leaves of dull green. It is the most attractive spreading evergreen, will grow in semi-shady locations. Hardiest of all Yews. By trimming the side branches the plant can be made to grow semi-upright and likewise by trimming the top branches the plant can be made to develop lower to the ground. Can also be trimmed into globe shape. Prices: 12 to 15 inch $2.00 each.

COLDEN RETINOSPORA
A handsome golden colored evergreen that is admired by all. Its pleasing shade provides the right amount of contrast when it is planted along with other evergreens along its side or back of it. Feathery, fernlike foliage can be kept trimmed to any size. No home foundation plantings are complete without this remarkable healthy evergreen. Price: 12 to 15 inches $2.00.

COMPACT GLOBULAR ARBOR-VITAE
Natural compact, globe-shaped, dark green foliage. The ideal low growing plant for massing against the taller evergreens in foundation plantings. Price: 12 to 15 inch $2.00.

HICK'S YEW
(Taxus cuspidata Hicksi)
Another form of Yew that is very similar to the Irish Yew, but is a much faster grower. The branches ascend almost vertically, generally growing with many stems. Its rich dark glossy green makes it much more attractive than Arbor-Vitaes or Junipers. Price: 12 to 15 inch $2.50 each.

IRISH JUNIPER
Forms a narrow and dense column, compact, bluish green foliage. Most attractive when planted around the foundation of a home at corners and entrances. Price: 24 to 36 inch $3.00 each.

All evergreens are shipped with Moss on the Roots.

American BOXWOOD
GROWN BY HARRISON BROTHERS
BERLIN, MARYLAND
—the real Aristocrat of the Evergreen family
YOU CAN SECURE THE FINEST SPECIMENS IN AMERICA FROM HARRISONS’

Possibly no evergreen shrub has been so much used for marking the boundaries of formal gardens, to outline flower beds, for low hedges, and for other ornamental purposes. The plants will adopt themselves to almost any situation and climate, and by judicious pruning can be trained to many forms.

Compact—Deep Glossy Leaves
Our Boxwood has deep glossy green leaves. They are dense, compact specimens, having been sheared many times. The leaves on this variety are small and resemble the dwarf English Boxwood. This variety is a dwarf grower, but it makes much faster growth than the English Boxwood. For those who want large Boxwood plants in a few years, this is the best variety to plant.

PRICES OF AMERICAN BOXWOOD
10 to 12 inches $1.50 each; 10 for $12.50

OLD ENGLISH BOXWOOD
The famous Dwarf Boxwood so much admired in old gardens. Slow growing, compact, most attractive. Will grow in sun or partial shade.
3 to 4 in. $5.00 ea.; 10 for $40.00
4 to 6 in. $5.50 ea.; 10 for $45.00
6 to 8 in. $6.00 ea.; 10 for $60.00

IRISH JUNIPER
EVERBLOOMING HYBRID TEAS

ETOILE DE HOLLANDE. At present considered most popular of crimson Hybrid Teas. Velvety scarlet-crimson with delicious fragrance, and enormous petals. It charms continuously with its delightful color, vigorous growth, and well-formed flowers on long stems. Faultless.

GOLDEN CHARM. All that its name implies. Deep golden buds opening to clear golden yellow. One of the best yellow Roses, and grows successfully throughout the nation.

KAISERIN AUGUSTE VICTORIA. Perfect creamy white bloom, slightly tinged with lemon, large and full. Long, shapely buds to full petaled, deliciously scented bloom. An old favorite that even today has not been surpassed.

PINK RADIANCE. A brilliant carmine-pink with yellow shading at base of petals, having a light silvery tone on the inside, and deeper on the outside. Vigorous, free bloomer, parent of Red Radiance. Among the oldest Roses, it has made good everywhere.

PRESIDENT HERBERT HOOVER. One of the outstanding Roses. A glorious new Rose of vivid cerise-red toned with yellow, orange and scarlet, richly perfumed and free flowering.

RED RADIANCE. A sport of the famous Radiance and identical in all characteristics, except color. A brilliant cerise-red color, and intensely fragrant. Tall and bushy, healthy foliage and excellent blooming qualities. The favorite red Rose of America's millions.

AMI QUINARD. Deep velvety red. CRIMSON GLORY. A national favorite among red roses.

The Colorful PEONIES
THEY RIVAL THE ROSE

Once planted they last for years. Their large, bright colored flowers during May and June furnish an abundance of flowers for the home. Can supply the following colors: WHITE, PINK and RED. State color desired.

Prices: 75c each; 3 for $1.95; 10 for $5.50.

CANDESA DE SASTAGO. Marvelously colored Rose with large cupped flowers of coppery red inside and rich yellow outside. A profuse bloomer at all times, keeps well when cut, and is spicily fragrant. Compares with the Radiance Rose in vigor and hardiness.

GOLDEN DAWN. Considered the finest yellow Rose. Blooms of soft lemon-yellow tinted with old rose markings, long-lasting fragrance of real tea scent. Hardy, bushy, medium height, and very vigorous.

POINSETTIA. Brilliant rich scarlet-red. Huge, ideal long, pointed buds; glorious flowers. Vigorous, tall grower, long stems, and richest scarlet-red. Grand, being a very fine Rose. Should be planted in every Rose garden.

TALISMAN. A multi-colored, glorious combination of orange, yellow and rose-red. They simply eclipse other Roses in autumn. Fine for decoration and cutting. The triple-tone flowers are produced all season.

HARRISON’S ROSE VARIETY SELECTION CONTAINS ONLY THE BEST THOROUGHLY TESTED VARIETIES

Multiflora Roses are Recommended by U.S. Soil Conservation Service for Soil-Erosion and the most practical plant for Wild Life.
NORTHERN STRAIN

- CHINESE ELM

Grows 20 Feet in Four Years

Because of its beauty and extremely rapid growth, Chinese Elm has become a leading shade tree of America. It is planted in every state and like its native country, Korea, withstands dense shade and extreme heat. It makes excellent shade in two to three years, growing about 6 feet growth annually. It is by far the fastest growing hard-wooded shade tree. It resembles the American Elm except that leaves are smaller with the gracefulness of a Cut-Leaf Birch. Prices: 3 to 4 ft., $1.95 each; 4 to 5 ft., $1.45 each; 5 to 6 ft., $1.95 each; 6 to 8 ft., $3.00 each.

- ORIENTAL PLANE

The Famous Light Bark Tree

AMERICAN ELM (Ulmus americana). A noble native tree of great size, wide spreading, gracefully curving branches, growing up in a form like the outline of long-stemmed flowers, in a tall vase. A superb tree of gigantic proportions, which is very hardy. Won high popularity in recent years due to its many merits, which have made it the most useful and the most sought for shade tree for lawns, parks, streets and highway plantings. Prices: 4 to 5 ft., $1.75 each; 5 to 6 ft., $2.75 each; 6 to 8 ft., $4.25 each.

WEEPING WILLOW

A rapid, low-spreading, graceful tree, thriving in any moist soil. The Willows are valuable and interesting subjects on account of their graceful aspect. Prices: 5 to 6 ft., $2.50 each; 6 to 8 ft., $3.25 each.

- NORWAY MAPLE

A tall, spirelike tree used for screens and formal plantings. It is fast growing, distinctly ornamental and beautiful. Prices: 5 to 6 ft., $1.25 each; 6 to 8 ft., $1.50 each.

- SILVER MAPLE

A rapid grower. Prices: 3 to 4 ft., $0.95 each; 4 to 5 ft., $1.45 each; 5 to 6 ft., $2.00 each; 6 to 8 ft., $2.50 each; 8 to 10 ft., $3.00 each; 10 to 12 ft., $4.50 each.

CHINESE CHESTNUTS

Now You Can Grow Chestnuts! Blight-Resistant Chestnut Trees

Only two years from this fall, right in your own grounds, you can pick big, fat, tasty Chestnuts from the trees you plant this year! Remember gathering Chestnuts in the good old days—haven't you felt sorry for your children because they couldn't? The devastating blight that stripped our forests of the native Chestnut was an American tragedy! Now these hardy, blight-resistant Chestnut trees will bring them back. More than that, you need not wait 15 to 20 years for nuts—they'll bear year after year! Plant in abundance Harrisons' strain of Chinese Chestnut Trees.

PRICES: 2 to 3 ft., $2.50 each.

- AMERICAN FILBERT

Old family favorite. Small, attractive bush, yielding abundant crops of tasty, round nuts. Bears very young.

PRICES: 2 to 3 ft., $2.00 each.

- ENGLISH WALNUT

Thin shelled, large, delicious nuts, producing heavy crops and demanding good prices. The most popular Walnut grown.

PRICES: 2 to 3 ft., $2.75 each.
AZALEA HINODEGIRI

Deep Coral-Pink Flowers

Azalea Hinodegiri is a dwarf grower with evergreen foliage. In the spring it produces a profusion of deep coral colored blossoms, completely hiding the foliage. Ideally suited for planting around the foundation of homes or adding color in front of evergreens. Grows well in the shade or sunlight.

Each

4 to 6 inches .................................................. $1.00
6 to 8 inches .................................................. 1.50
8 to 10 inches ................................................. 2.00

CREPE MYRTLE (Lagerstroemia Indica). Small green, glossy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. 1 1/2 to 2 ft., $1.50 each.

QUINCE, FLOWERING (Cydonia Japonica). Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs. 1 to 1 1/2 ft., $1.00 each.

SPIREA ANTHONY WATERER. Crimson flowers in large, flat clusters. Blooms early and continues till fall. 15 to 18 inches, $1.00 each.

BEAUTY BUSH. Pink Tubular flowers, heavy bloomer, hardy. 2 to 3 ft., $1.25 each.

HYDRANGEA PEE GEE (Hydrangea Paniculata Grandiflora). Large flowers; first white, then pink, followed by reddish bronze in the fall. Blooms midsummer to fall. 18 to 24 inches, $1.00 each.
GREEN BARBERRY—Green in the summer, turning to a brilliant coppery red
A protection against small animals, because of the sharp thorns.

IT WILL BE GREATLY APPRECIATED IF YOU WILL WRITE THE NAME AND ADDRESS OF A FRIEND WHO IS INTERESTED IN PLANTING FRUIT TREES, BERRY PLANTS OR ORNAMENTALS. THANKS.

ABOUT SHIPPING—PLEASE READ

HOW WE SHIP—All stock is priced f. o. b. Berlin, Maryland. The method by which shipment can be made depends entirely on the type of stock and quantity ordered. Small size fruit trees, strawberry plants, small fruits, roses, small shrubs, vines and peonies can be shipped by parcel post when ordered in small quantities. We estimate the postage on these items to be about 10% of the purchase price of the plant. If sufficient postage is not remitted with order we reserve the right to change the method of shipment, or we will ship by parcel post and customer can then pay the additional postage; any excess postage charges which are sent to us will be refunded. Large size fruit trees, shade trees, evergreens, etc., also large quantities of small size fruit trees, small fruits, roses, shrubs, vines, peonies, etc., cannot be shipped by parcel post due to size, length and weight and they must be shipped by express or freight with the customer paying the transportation charges when they are delivered. Freight is the cheapest way of shipping balled and burlapped plants such as evergreens, Boxwood, Azaleas, etc., also shade trees, shrubs, and small fruits when ordered in medium to large quantities. 500 or more strawberry plants should go forward by express. When sending in your order, be sure to give us the name of the nearest express or freight station. If you will leave the matter to us we will ship your order the best way. Safe arrival guaranteed.

WHEN TO SHIP—Our fall shipping season commences about October 15th and continues through the winter and in the spring until May 15th. Order early and we will make the shipment any time that you might desire. If no specified date is requested we will ship the stock at proper planting time for your section.
